

Sleep, Baby. Please.

THE 12-WEEK SYSTEM PLANNER

Finally — a planner built around YOUR baby, not a generic schedule.

A premium 12-week undated fillable planner covering all 12 chapters.

Awake windows, bedtime routine builder, night waking log, method tracker, weekly reflection.

The all-in-one companion to the ebook.

How to Use This Planner

START HERE

Work through one week at a time. Undated, flexible, and designed to be used in real life.

1

Read the chapter first

Each week maps to one chapter. Read, then apply.

2

Fill in every section

The logs reveal patterns your tired brain can miss.

3

Write your routine and post it

Use the routine page to lock in the order.

4

Review weekly

Compare week to week. Progress often shows up on paper first.

5

Grace over perfection

A used planner beats a perfect unused one.

My Baby's Sleep Profile

PROFILE

Fill this in before Week 1. Update as your baby grows.

Baby's Details

Baby's Name

Date of Birth

Current Age

Planner Start Date

Pediatrician / Healthcare Provider

Current Sleep Challenges

My Baby's Sleep Personality

Choose the dominant type. You can change this later.

- ☐ **The Snacker** *Needs frequent small feeds to feel settled.*
- ☐ **The Overthinker** *Startles easily, very alert to environment.*
- ☐ **The Sensitive Soul** *Overwhelmed quickly by noise, light, transitions.*
- ☐ **The Night Owl** *Wired late, genuinely not tired at 'normal' bedtime.*
- ☐ **The Catnapper** *Wakes reliably after 45 minutes and can't resettle.*
- ☐ **The Party Animal** *FOMO drives everything — stimulation = awake.*

Chosen Sleep Method

- ☐ Extinction (CIO) | Cry: High | Speed: Fast (3–5 days)
- ☐ Ferber / Graduated Extinction | Cry: Moderate | Speed: Medium (5–7 days)
- ☐ Chair Method | Cry: Low–Moderate | Speed: Slower (2–3 weeks)
- ☐ Fading | Cry: Low | Speed: Slowest (3–4+ weeks)
- ☐ Pick Up / Put Down | Cry: Low | Speed: Variable

Your Sleep Promise

PROMISE

A commitment to your baby — and to yourself.

- ☐ I will keep bedtime simple and in the same order every night.
- ☐ I will watch awake windows and act before overtiredness sets in.
- ☐ I will decide how to respond to night wakings before the night begins.
- ☐ I will pause before going in and give my baby the chance to resettle.
- ☐ I will not judge the whole plan on the basis of one difficult night.
- ☐ I will stay consistent — especially on the nights when it is hardest.
- ☐ I am not just surviving the night. I am teaching my baby a lifelong skill.

Sleep is coming. For both of you.

- ☐ I have read this promise and I commit to working the plan.

Week 1 · Why Your Baby Won't Sleep

CHAPTER 1

Understanding the 'why' is the first step to sleep.

Week Setup

Week Dates

Baby's Age This Week

Baby's Weight (optional)

Sleep Method This Week

This Week's Intention

Key Takeaways

- Sleep associations are the #1 culprit — what happens at sleep onset will be needed at every waking.
- Overtiredness triggers cortisol, making it harder to fall asleep — timing is everything.
- Developmental leaps cause temporary regressions — they are normal and they end.
- You did not cause this by being a loving, responsive parent.

Week 1 · Bedtime Routine Builder

WEEK 1

Same order, every night. Write your version clearly and use the checks.

Routine Timing

Target: 20–30 min

#	Step	Our Version / What We Do	Mon	Wed	Fri
1	Transition Signal		☐	☐	☐
2	Stop Stimulating Activity		☐	☐	☐
3	Bath or Warm Wipe-Down		☐	☐	☐
4	Lotion Massage		☐	☐	☐
5	Pajamas + Sleep Sack		☐	☐	☐
6	Feed — Dim, Quiet Room		☐	☐	☐
7	Books or Lullaby		☐	☐	☐
8	Final Goodnight Phrase		☐	☐	☐
9	White Noise ON		☐	☐	☐
10	Room Fully Dark		☐	☐	☐
11	Into Crib — Drowsy Awake		☐	☐	☐
12	Parent Exits Calmly		☐	☐	☐

Nightly Checklist

- | | |
|--|---|
| ☐ Bedtime is consistent (within 15 min of target) | ☐ Baby placed in crib drowsy but awake |
| ☐ Awake window honoured — not over or under | ☐ White noise confirmed on |
| ☐ Routine followed in correct order | ☐ Room confirmed fully dark |
| ☐ Feed did not become a sleep association | ☐ Parent exited calmly |

Week 1 • Weekly Reflection

WEEK 1

Take five honest minutes. Reflection is where progress gets sharper.

Q1 What went well this week?

Even one small win counts.

Q2 What was the hardest moment?

Name it. Acknowledge it. You survived it.

Q3 What patterns did you notice in the Night Waking Log?

Look for repeated waking times or triggers.

Q4 What would you do differently next week?

One specific change only.

Q5 What is your baby teaching you this week?

About temperament, timing, and needs.

Week 1 • Week at a Glance

WEEK 1

Capture the data that matters and set up the next week.

Sleep Stats

Best night

Hardest night

Avg. wakings / night

Avg. settle time

Longest sleep stretch

Avg. bedtime

Avg. morning wake

Next Week Intention

You are not just surviving the night. You are teaching your baby a skill for life.

[Previous](#)[Home](#)[Next](#)

Week 2 · Sleep Science Every Parent Needs

CHAPTER 2

Awake windows, cortisol, melatonin — made practical.

Week Setup

Week Dates

Baby's Age This Week

Baby's Weight (optional)

Sleep Method This Week

This Week's Intention

Key Takeaways

- Sleep pressure builds with wake time — hit the sweet spot, not too early or late.
- The circadian rhythm is trainable from 6–8 weeks — light is your lever.
- 'Sleeping through' = a 5–6 hour stretch clinically. A 3-month 6-hour stretch is a win.
- Baby sleep cycles are ~45 minutes vs adult 90 minutes — transitions matter.

Week 3 · Reading Your Baby's Sleep Cues

CHAPTER 3

Catch the green light before you hit red.

Week Setup

Week Dates

Baby's Age This Week

Baby's Weight (optional)

Sleep Method This Week

This Week's Intention

Key Takeaways

- Green cues: quieting down, slowing movements — start wind-down now.
- Yellow cues: yawning, eye-rubbing — go time, get to the crib.
- Red cues: arching back, second wind — overtired and harder ahead.
- Set a timer based on awake window — don't rely on cues alone.

Week 4 · Building a Bedtime Routine

CHAPTER 4

Same order, every night. This week, lock it in.

Week Setup

Week Dates

Baby's Age This Week

Baby's Weight (optional)

Sleep Method This Week

This Week's Intention

Key Takeaways

- Same sequence every night — the order is the signal.
- 20–30 minutes total — too short doesn't wind down, too long risks in-routine sleep.
- Bath → Lotion → PJs → Feed → Song → Crib. Write it. Post it.
- Drowsy but awake into the crib — that's the skill.

Week 5 · Setting the Sleep Environment

CHAPTER 5

Darkness, white noise, temperature — your checklist.

Week Setup

Week Dates

Baby's Age This Week

Baby's Weight (optional)

Sleep Method This Week

This Week's Intention

Key Takeaways

- True blackout means you cannot see your hand in front of your face.
- White noise at 60–65 dB measured at baby's head, not inside crib.
- Ideal room temp: 68–72°F / 20–22°C.
- Cover all glowing LEDs — even dim light can interfere with melatonin.

Week 5 • Weekly Reflection

WEEK 5

Take five honest minutes. Reflection is where progress gets sharper.

Q1 What went well this week?

Even one small win counts.

Q2 What was the hardest moment?

Name it. Acknowledge it. You survived it.

Q3 What patterns did you notice in the Night Waking Log?

Look for repeated waking times or triggers.

Q4 What would you do differently next week?

One specific change only.

Q5 What is your baby teaching you this week?

About temperament, timing, and needs.

Week 5 • Week at a Glance

WEEK 5

Capture the data that matters and set up the next week.

Sleep Stats

Best night

Hardest night

Avg. wakings / night

Avg. settle time

Longest sleep stretch

Avg. bedtime

Avg. morning wake

Next Week Intention

Two steps forward, one step back. You're still moving forward.

Week 6 • The Sleep Training Debate

CHAPTER 6

Choose your method. Write it down. Stick to it.

Week Setup

Week Dates

Baby's Age This Week

Baby's Weight (optional)

Sleep Method This Week

This Week's Intention

Key Takeaways

- Any method works if applied consistently — inconsistency is what fails.
- Choose based on your temperament and your baby's temperament.
- Write your method down before tonight. Your 2am brain will thank your 2pm brain.
- Give any method at least 5–7 consistent nights before judging it.

CHAPTER 8

Know your baby's type. Work with it, not against it.

Week Setup

Week Dates

Baby's Age This Week

Baby's Weight (optional)

Sleep Method This Week

This Week's Intention

Key Takeaways

- The Snacker needs gradually longer gaps between feeds.
- The Sensitive Soul needs extra calm-down buffer.
- The Night Owl needs a bedtime shift earlier by 10 minutes every 2–3 days.
- The Catnapper needs practice linking cycles.

Week 11 • Bedtime Routine Builder

WEEK 11

Same order, every night. Write your version clearly and use the checks.

Routine Timing

Target: 20–30 min

#	Step	Our Version / What We Do	Mon	Wed	Fri
1	Transition Signal		☐	☐	☐
2	Stop Stimulating Activity		☐	☐	☐
3	Bath or Warm Wipe-Down		☐	☐	☐
4	Lotion Massage		☐	☐	☐
5	Pajamas + Sleep Sack		☐	☐	☐
6	Feed — Dim, Quiet Room		☐	☐	☐
7	Books or Lullaby		☐	☐	☐
8	Final Goodnight Phrase		☐	☐	☐
9	White Noise ON		☐	☐	☐
10	Room Fully Dark		☐	☐	☐
11	Into Crib — Drowsy Awake		☐	☐	☐
12	Parent Exits Calmly		☐	☐	☐

Nightly Checklist

- | | |
|--|---|
| ☐ Bedtime is consistent (within 15 min of target) | ☐ Baby placed in crib drowsy but awake |
| ☐ Awake window honoured — not over or under | ☐ White noise confirmed on |
| ☐ Routine followed in correct order | ☐ Room confirmed fully dark |
| ☐ Feed did not become a sleep association | ☐ Parent exited calmly |

Week 11 • Weekly Reflection

WEEK 11

Take five honest minutes. Reflection is where progress gets sharper.

Q1 What went well this week?

Even one small win counts.

Q2 What was the hardest moment?

Name it. Acknowledge it. You survived it.

Q3 What patterns did you notice in the Night Waking Log?

Look for repeated waking times or triggers.

Q4 What would you do differently next week?

One specific change only.

Q5 What is your baby teaching you this week?

About temperament, timing, and needs.

Week 11 • Week at a Glance

WEEK 11

Capture the data that matters and set up the next week.

Sleep Stats

Best night

Hardest night

Avg. wakings / night

Avg. settle time

Longest sleep stretch

Avg. bedtime

Avg. morning wake

Next Week Intention

The negotiations are real. Stay kind and firm.

Week 12 • Your First-Week Game Plan

CHAPTER 12

Night-by-night. You have everything you need.

Week Setup

Week Dates

Baby's Age This Week

Baby's Weight (optional)

Sleep Method This Week

This Week's Intention

Key Takeaways

- Night 1–2: hardest. Expect resistance.
- Night 3–4: most families see a shift.
- Night 5–7: the groove begins.
- One bad night does not undo five good ones.

Awake Windows — Quick Reference

REFERENCE

Use this whenever wake timing feels off.

Age	Window	Naps	Bedtime	Notes
0–6 weeks	45–60 min	4–5/day	Variable	Feed-wake-sleep cycle. No
6–12 weeks	60–90 min	4/day	8–9 p.m.	Circadian rhythm developin
3–4 months	90 min	3–4/day	7:30–8:30 p.m.	4-month regression risk.
4–6 months	2 hrs	3/day	7–8 p.m.	Good time to start a metho
6–8 months	2.5 hrs	2–3/day	7–8 p.m.	2-nap transition zone.
8–12 months	3–3.5 hrs	2/day	6:30–7:30 p.m.	2 naps firm.
12–18 months	4–5 hrs	1–2/day	7–7:30 p.m.	1-nap transition begins.
18–24 months	5–6 hrs	1/day	7–7:30 p.m.	Nap drop later.

Sleep Methods — Comparison & Guide

REFERENCE

Choose one and stay with it long enough to evaluate fairly.

Extinction (CIO)

Cry level: High | Speed: Fast (3–5 days) | Best for: Persistent babies; exhausted families

Place baby in crib awake. Do not return until morning or a planned feed.

Ferber / Graduated Extinction

Cry level: Moderate | Speed: Medium (5–7 days) | Best for: Most temperaments

Timed check-ins at increasing intervals. Comfort voice only.

Chair Method

Cry level: Low–Moderate | Speed: Slower (2–3 weeks) | Best for: Sensitive babies

Sit in chair by crib. Move chair farther every 2–3 nights.

Fading

Cry level: Low | Speed: Slowest (3–4+ weeks) | Best for: Gentle approach

Gradually reduce your involvement over time.

Pick Up / Put Down

Cry level: Low | Speed: Variable | Best for: Young babies; high support needs

Pick up when crying. Put down when calm. Repeat until asleep.

[Previous](#)[Home](#)[Next](#)

The Six Sleep Personalities

REFERENCE

Work with temperament, not against it.

The Snacker

Needs frequent small feeds to feel settled.

Key approach: Gradually lengthen the gap between feeds. Ensure full feeds during the day.

The Overthinker

Startles easily, very alert to environment.

Key approach: Deep, firm swaddle. Very consistent routine. Minimal stimulation before bed.

The Sensitive Soul

Overwhelmed quickly by noise, light, transitions.

Key approach: Extra long calm-down buffer before crib. Dimmer, quieter, slower everything.

The Night Owl

Wired late, genuinely not tired at 'normal' bedtime.

Key approach: Push bedtime earlier by 10 minutes every 2–3 days until you hit the sweet spot.

The Catnapper

Wakes reliably after 45 minutes and can't resettle.

Key approach: Practice settling at cycle transitions. Stay close but don't rescue immediately.

The Party Animal

FOMO drives everything — stimulation = awake.

Key approach: Boring, dark, silent exits. Make sleep the least interesting option.

Safe Sleep Checklist

REFERENCE

A practical nightly checklist page.

- ☐ Firm, flat mattress — no incline, wedge, or pillow-top
- ☐ Fitted sheet only — no blankets, bumpers, pillows, positioners
- ☐ Baby on their back — every sleep, every time
- ☐ Sleep sack used instead of a loose blanket
- ☐ Room temperature 68–72°F / 20–22°C confirmed
- ☐ True blackout achieved
- ☐ White noise running (not inside the crib)
- ☐ All monitor and device LEDs covered
- ☐ No nightlight, or red-spectrum only
- ☐ Sleep space is crib/bassinet/play yard — not swing or car seat
