

Sleep, Baby. Please.

THE 12-WEEK SYSTEM PLANNER

Finally — a planner built around YOUR baby, not a generic schedule.

A premium 12-week undated fillable planner covering all 12 chapters.

Awake windows, bedtime routine builder, night waking log, method tracker, and weekly reflection.

The all-in-one companion to the ebook.

How to Use This Planner

One week at a time. Real-life use beats perfect use.

1

Read the chapter first

Each week maps to a chapter. Read, then apply.

2

Fill in the pages

The logs reveal patterns tired brains miss.

3

Write your real routine

The routine page turns ideas into a repeatable order.

4

Track nights honestly

Good nights and hard nights both matter.

5

Reflect weekly

Progress often shows up on paper before it feels obvious.

PROFILE

My Baby's Sleep Profile

Fill this in before Week 1. Update as your baby grows.

Baby's Details

Baby's Name

Date of Birth

Current Age

Planner Start Date

Pediatrician / Healthcare Provider

Current Sleep Challenges

My Baby's Sleep Personality

- ☐ **The Snacker** Needs frequent small feeds to feel settled.
- ☐ **The Overthinker** Startles easily and stays alert.
- ☐ **The Sensitive Soul** Gets overwhelmed easily by noise, light, and touch.
- ☐ **The Night Owl** Wired late and genuinely not tired at a typical bedtime.
- ☐ **The Catnapper** Wakes after one short cycle and struggles to return to sleep.
- ☐ **The Party Animal** FOMO drives everything.

Chosen Sleep Method

- ☐ Extinction (CIO) | Cry: High | Speed: Fast (3–5 days)
- ☐ Ferber / Graduated Extinction | Cry: Moderate | Speed: Medium (5–7 days)
- ☐ Chair Method | Cry: Low–Moderate | Speed: Slower (2–3 weeks)
- ☐ Fading | Cry: Low | Speed: Slowest (3–4+ weeks)
- ☐ Pick Up / Put Down | Cry: Low | Speed: Variable

PROMISE

Your Sleep Promise

A commitment to your baby — and to yourself.

- ☐ I will keep bedtime simple and in the same order every night.
- ☐ I will watch awake windows and act before overtiredness sets in.
- ☐ I will decide how to respond to night wakings before the night begins.
- ☐ I will pause before going in and give my baby the chance to resettle.
- ☐ I will not judge the whole plan on the basis of one difficult night.
- ☐ I will stay consistent — especially on the nights when it is hardest.
- ☐ I am not just surviving the night. I am teaching my baby a lifelong skill.

Sleep is coming. For both of you.

- ☐ I have read this promise and I commit to working the plan.

CHAPTER 1

Week 1 • Why Your Baby Won't Sleep

Understanding the 'why' is the first step to sleep.

[Open](#)[Awake](#)[Routine](#)[Night](#)[Method](#)[Reflect](#)

Week Setup

Week Dates

Baby's Age This Week

Baby's Weight (optional)

Method This Week

This Week's Intention

Key Takeaways

- Sleep associations are the #1 culprit — what happens at sleep onset will be needed at every waking.
- Overtiredness triggers cortisol, making it harder to fall asleep — timing is everything.
- Developmental leaps cause temporary regressions — they are normal and they end.
- You did not cause this by being a loving, responsive parent.

CHAPTER 2

Week 2 · Sleep Science Every Parent Needs

Awake windows, cortisol, melatonin — made practical.

Open

Awake

Routine

Night

Method

Reflect

Week Setup

Week Dates

Baby's Age This Week

Baby's Weight (optional)

Method This Week

This Week's Intention

Key Takeaways

- Sleep pressure builds with wake time — hit the sweet spot, not too early or late.
- The circadian rhythm is trainable from 6–8 weeks — light is your lever.
- Sleeping through is often just a 5–6 hour stretch clinically.
- Baby sleep cycles are shorter than adult cycles — transitions matter.

7		Y N		Y N		

Method note

Any method can work if it is applied consistently enough to be fairly judged.

Biggest method lesson this week

WEEK 10

Week 10 • Weekly Reflection

Take five honest minutes. Reflection sharpens progress.

Q1 What went well this week?

Even one small win counts.

Q2 What was the hardest moment?

Name it. Acknowledge it. You survived it.

Q3 What patterns did you notice in the Night Waking Log?

Look for repeated waking times or repeated triggers.

Q4 What would you do differently next week?

One specific change only.

Q5 What is your baby teaching you this week?

About temperament, timing, and needs.

Nightly Checklist

- ☐ Bedtime is consistent (within 15 min of target)
- ☐ Baby placed in crib drowsy but awake
- ☐ Awake window honoured — not over or under
- ☐ White noise confirmed on
- ☐ Routine followed in correct order
- ☐ Room confirmed fully dark
- ☐ Feed did not become a sleep association
- ☐ Parent exited calmly

WEEK 11

REFERENCE

Sleep Methods — Comparison & Guide

Choose one and stay with it long enough to evaluate fairly.

Extinction (CIO)

Cry level: High | Speed: Fast (3–5 days) | Best for: Persistent babies; high-sleep-need families

Place baby in crib awake and follow through without checks.

Ferber / Graduated Extinction

Cry level: Moderate | Speed: Medium (5–7 days) | Best for: Most temperaments

Timed check-ins with increasing intervals.

Chair Method

Cry level: Low–Moderate | Speed: Slower (2–3 weeks) | Best for: Sensitive babies

Stay nearby and gradually move away over time.

Fading

Cry level: Low | Speed: Slowest (3–4+ weeks) | Best for: Gentle approach

Reduce support step by step.

Pick Up / Put Down

Cry level: Low | Speed: Variable | Best for: Young babies; high support needs

Pick up when upset, put down when calm, repeat consistently.

REFERENCE

The Six Sleep Personalities

Work with temperament, not against it.

The Snacker

Needs frequent small feeds to feel settled.

Key approach: Gradually lengthen the gap between feeds.
Ensure full feeds during the day.

The Overthinker

Startles easily and stays alert.

Key approach: Use deep calm, low stimulation, and strong routine consistency.

The Sensitive Soul

Gets overwhelmed easily by noise, light, and transitions.

Key approach: Use extra-long calm-down time and a slower pre-bed rhythm.

The Night Owl

Wired late and genuinely not tired at a typical bedtime.

Key approach: Shift bedtime earlier gradually until you find the sweet spot.

The Catnapper

Wakes after one short cycle and struggles to resettle.

Key approach: Practice linking cycles with consistent settling support.

The Party Animal

FOMO drives everything.

Key approach: Make bedtime boring, calm, and ultra-predictable.

[Previous](#)[Home](#)[Next](#)

REFERENCE

Safe Sleep Checklist

A practical nightly checklist page.

- ☐ Firm, flat mattress — no incline, wedge, or pillow-top
- ☐ Fitted sheet only — no blankets, bumpers, pillows, or positioners
- ☐ Baby on their back — every sleep, every time
- ☐ Sleep sack used instead of loose blanket
- ☐ Room temperature 68–72°F / 20–22°C confirmed
- ☐ True blackout achieved
- ☐ White noise running (not inside the crib)
- ☐ All monitor and device LEDs covered
- ☐ No nightlight, or red-spectrum only
- ☐ Sleep space is crib, bassinet, or play yard — not swing or car seat
